Rear axle ADA1100

General

ADA1100 is an air suspended rear axle intended for a maximum axle pressure of 11.5 tonnes. ADA1100 uses thinner sheet metal than ADA1300 and is therefore lighter.

Brakes

When working on the brakes, refer to Workshop manual *10:02-06, Wheel brake components, Function and Work Description*.

Hub

When working on the hub, refer to Workshop manual *09:02-01, Rear wheel hub ADA1300*.

Mounting

The mounting of the axle is the same as on the ADA1300 rear axle.
