Clutch

K432 15

K432 16

K432 17

K432 18

Specifications

Clutch

K432 15, K432 16, K432 17, K432 18

Specifications

Type	Pull type
Lining diameter	430 mm
Pressure plate lift	min. 1.8 mm
Clutch plate, max. distortion	0.8 mm
Tightening torque	47 Nm

Special tools

Number	Designation	Drawing
99 315	Gauge	 99 315

Checking plate wear

Plate wear must be measured directly on the plate.

Use gauge 99 315 and measure through the prising hole in the flywheel housing as illustrated.

The thickness of a new plate is 10 mm, and the wear limit is 7 mm.
